

ARTICULATING PAPER

BITE REGISTRATION

✓ is used to identify contact points between the maxillary and mandibular teeth during all forms of natural tooth occlusal adjustments and dental prosthesis insertions. BMS Dental Articulating paper helps the dentists to restore properly functioning of bite occlusion. Each strip has excellent marking properties thanks to its thickness and flexibility, suitable to simultaneously reach any cusps and cavities, even on moist surfaces. Vibrant colours ensure clear and precise contact identification and blue/red helps differentiate the markings of the maxillary from the mandibular arch. Available in straight version.

✓ Main Characteristics:

- Paper thickness: 80 μ
- Straight, 20 x 105 mm
- Thin and tear-resistant
- Deep colours for good marking (blue/red version)
- Good marking properties on moist occlusal surfaces (gold, ceramic, polished metal, acrylic)

✓ **Packing** 
12 sheets
