

VINYLBITE

Medium consistency Vinyl Polysiloxane material for Bite Registrations

✓ is an addition type silicone polyvinylsiloxane based, specifically formulated for bite registrations.

✓ **Technical Characteristic**

Mixing time	Working time	Minimum time in mouth	Dimensional change after 24 hours	Reproduction of details	Hardness Shore A
auto mixing	45"	60'	-0.02%	5µm	95

Color	ISO 4823
Light Blue	Type B

✓ **Packing** 
2 x 50 mL Cartridge
+ 12 mixing tips

- **Measurement at 23 +/- 2°C and 50 +/- 10% relative humidity.**

✓ **Main Characteristics:**

- Scannable using CAD systems (optical/laser/tactile scanning systems)
- Easy handling and dispensing thanks to the 1:1 double-cartridge
- Thixotropic Working Time
- High details definition & Fast setting time & High tear resistance
- Excellent dimensional stability in time, even in presence of high temperatures
- Special consistency for bite registrations
- Non-sticky
