

# FILLBEST

Glass Ionomer Cement for filling and restorations

 **Characteristics and Advantages**

|                                          |                                |
|------------------------------------------|--------------------------------|
| Excellent early translucency             | Superior aesthetics            |
| Exceptional strength                     | Long lasting restorations      |
| Packable consistency                     | For ease of handling           |
| High level of sustained fluoride release | Prevention of secondary caries |
| High wear and erosion resistance         | Durable restorations           |
| Universal Shade                          | Excellent tooth matching       |
| Easy mixing                              | To reduce surgery time         |

 **Technical Characteristic**

Class V cavities (particularly erosion lesions),  
class III cavities, posterior cavities in deciduous  
teeth, ‘sticky’ pits and fissures

- **Working Time: 1:57 min.**
- **Net Setting Time: 2:32 min**
- **Compressive Strenght: 258 Mpa**

 **Packing** 

15 gram Powder  
8 ml Liquid  
Powder Scoop, Mixing Pad
