

VINYLIGHT

Light consistency Vinyl Polysiloxane impression material

✔ is a light body silicon vinyl polysiloxane based addition type for the highest precision in details reproduction, specially formulated for both two-stage putty/wash and one-stage putty/wash techniques. Low viscosity. No release of toxic substances during and after curing.

✔ Technical Characteristic

Mixing time	Working time	Minimum time in mouth	Elastic recovery	Resistance to compression	Dimensional change after 24 hours
auto mixing	1'20"	60'	99,9%	4%	-0.02%

Reproduction of details	Hardness Shore A	Color	ISO 4823
5µm	47	Turquoise	Type 3

✔ **Packing** 
2 x 50 mL Cartridge
+ 12 mixing tips

- Recorded at 23 +/- 2°C and 50+/-10% relative humidity.

✔ Main Characteristics:

- Easy dispensing (light body in cartridges)
- High hydrophilicity & High tear resistance
- Excellent elastic properties
- Permanent dimensions stability
- Non sticky
